

STATUS: Underway.

PROJECT: Commercial Vehicle Information System Network (CVISN)

DESCRIPTION: This is a national program designed to integrate information systems, networks and technology to improve highway safety. This project includes systems to support electronic application for and issuance of motor carrier credentials; use of laptop computers and mobile communications technology to enable the law enforcement community to send and receive safety information; and feasibility testing of electronic screening for motor carriers to use technology to identify non-compliant carriers.

JUSTIFICATION: This project provides numerous efficiencies for Maryland's agencies as it brings together common objectives concerning highway safety and congestion, and also aids in economic development. Provides electronic access to national and state databases on motor carrier's safety and performance records, allows for a single location (one-stop shopping) for motor carrier credentials, sharing data with other states, streamlines the administrative process for businesses and government, and provides more timely and accurate electronic data transmission to promote highway safety.
